

CHECK PRINTING SOFTWARE | COLOR MICR CHECKS

Full-color checks on blank safety stock, in one pass

CheckStream® Color Plus merges your financial data onto blank perforated paper and prints the complete color check, MICR line and endorsement side included, on our color MICR printers.

INSIDE

- 300 check forms, plus default forms for 10 of the most popular accounting packages
- Embedded security features printed into every check background
- Runs on the 4-color SP C840DNM and the 5-color Pro C7210XM

THE BOTTOM LINE

Printing checks is an exact science, with precise tolerances for MICR character position, signal strength, security features and check forms. That does not mean it has to be difficult. CheckStream Color Plus prints 4-color checks with logos and the endorsement side in one pass, on blank safety stock. It includes 300 check forms and works with 10 of the most-used accounting packages.

CHECKSTREAM COLOR PLUS

What CheckStream Color Plus delivers

300 Check forms included	10 Most-used accounting packages preloaded with default forms	One pass Check face, color background, MICR line and endorsement side	Unlimited Accounts, set up in simple one-time steps
------------------------------------	---	---	---

Beautiful

Print 4-color checks with logos and the endorsement side in one pass.

Secure

Use blank safety stock.

Affordable

No more expensive pre-printed stock inventory or swapping paper supplies.

Safe

Embedded security features.

Fits your workflow

300 check forms. Works with 10 most-used accounting packages.

In-house transactional check printing

EOBs, claim checks, coupons and more.

Workgroup and production options

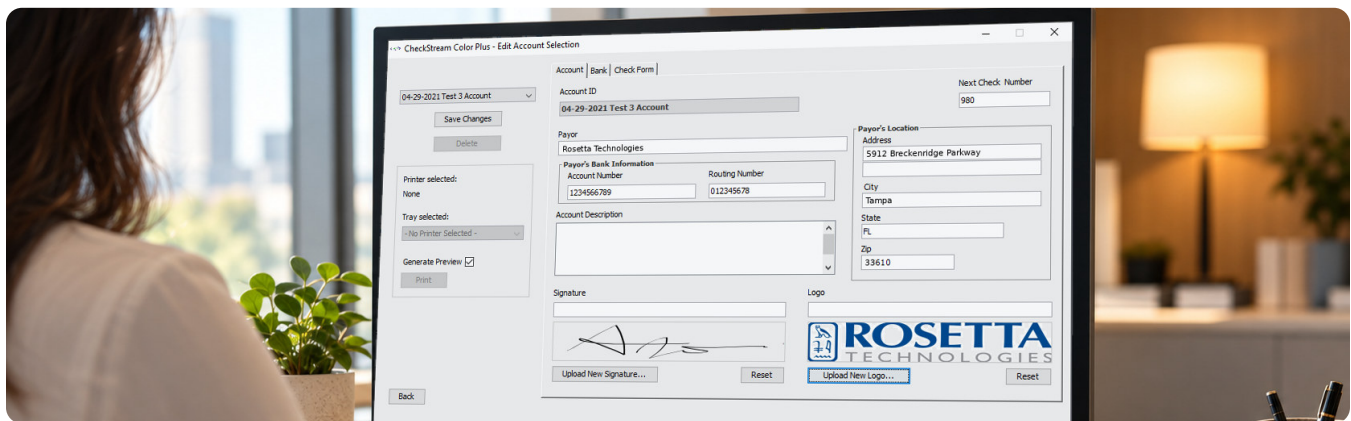

CheckStream Color Plus is a front-end software utility available exclusively with our 4-color SP C840DNM and 5-color Pro C7210XM Color MICR printers.

HOW IT WORKS

Set up once, then print every check you need

CheckStream Color Plus makes it easy to set up accounts and merge variable financial data to print full-color checks onto blank perforated paper. It integrates directly with color MICR workgroup and production printers engineered by Rosetta Technologies and powered by Ricoh.

- Create an unlimited number of accounts using simple one-time set-up steps.
- CheckStream Color Plus securely stores all unique account information, properly selects the check forms, sequentially numbers checks and performs error-free job recovery.
- Change signatures, logos and bank accounts on the fly.
- Select any active Rosetta Technologies color MICR printer on the network.

Every element of the check, printed together

CheckStream Color Plus prints fixed check form data, including the “PAY TO THE ORDER OF” lines and boxes, payor and bank information, and the MICR line. It also prints variable information such as the date, payee, amount fields and payor signature. With standard automatic duplexing available on Rosetta Technologies and Ricoh color MICR printers, CheckStream Color Plus also prints the endorsement side of the check in the same pass.

Security built into the background

Checks printed on any Rosetta Technologies color MICR workgroup or production printer using CheckStream Color Plus carry embedded security features imprinted into the colored background, such as:

- VOID Pantograph
- Eurion Dot Security
- Microprint
- Watermarks

ACCOUNTING WORKFLOW

Fits your accounting workflow

CheckStream Color Plus includes 300 different check forms and an array of colored backgrounds. Print styles include check on top, check in the middle, check on bottom, and three-up. It is preloaded with default check forms for 10 of the most popular accounting packages, including:

- QuickBooks
- Microsoft Dynamics
- Yardi
- Propertyware, and more

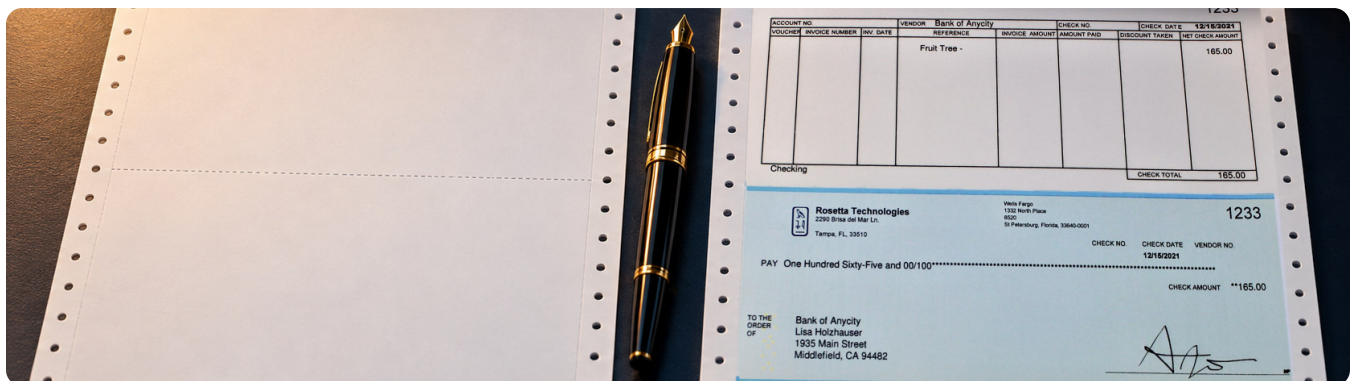

Eliminates pre-printed check stock

CPAs, financial institutions, payroll companies and property management firms, any business that prints checks for multiple clients, can stop continuously ordering, managing and securing expensive pre-printed check stock. With CheckStream Color Plus and Rosetta Technologies and Ricoh color MICR printers, you simply inventory blank white perforated safety stock and create every check for every account. Print all fixed and variable check form data, including the MICR line and incremental check numbers, in one pass, transforming white safety paper into negotiable financial documents.

- Print only the checks you need, only when needed.
- Print color backgrounds with embedded security features and the endorsement side.
- No need to secure pre-printed check stock, or worry about running short ever again.
- Reduce waste and the need to destroy check forms each time an address, bank or account number changes.

In-house transactional check printing

Businesses of all types and sizes cut hundreds of checks every month to suppliers, customers, employees and service providers. Some enterprises, like insurance companies, are in the business of printing EOBs and claim checks. Whatever the application, CheckStream Color Plus and our color MICR printer line make it easy to print live transactional checks, including the amount, MICR line and authorized payor signature, onto plain paper.

IMPLEMENTATION

CheckStream implementation specifications

CheckStream integrates with your existing business-critical infrastructure. CheckStream Color Plus is compatible with Windows desktop, server and virtual environments.

Hardware requirements

Client OS	Windows 7, 8, 8.1, 10, 11, Windows server 2016, 2019, 2022
CPU	Intel i5 or higher
Memory	2 GB RAM recommended (OS-dependent)
Hard Disk Drive	20 GB with 512 MB free space for program installation, scripts, forms and configuration files
Monitor	Resolution 1920x1080 dpi or higher
Network	Ethernet Network Card or Wireless Access Point
Printer	4-color SP C840DNM workgroup printer 5-color Pro C7210XM Color MICR production printer

Additional considerations

Additional HDD spooling space is required for server load and printing habits. You also need TCP/IP networking capability and the Java Run-time: the latest version from Oracle is required, version 8.11.123 or higher.

PRODUCTION

Production color check printing

For large banks, service bureaus and other companies with high blank check printing volumes, CheckStream Color Plus is built to pair with the Pro C7210XM 5-color printer: engineered by Rosetta Technologies, powered by Ricoh.

FROM ROSETTA TECHNOLOGIES

Print the whole check in-house

CheckStream Color Plus and our color MICR printers turn blank safety stock into finished, secure checks for every account you manage. For more information on these and other solutions, get in touch.

Tell us how many accounts and checks you print, and we will show you how CheckStream Color Plus fits your workflow.
